

WEST OSO INDEPENDENT SCHOOL DISTRICT

5350 BEAR LANE CORPUS CHRISTI, TEXAS 78405

FLOW CHART FOR COVID-19

Staff/Student is confirmed to have tested positive for COVID-19 or have symptoms regardless of vaccination status.

If you had no symptoms

When you have COVID-19, isolation is counted in days as follows:

If you had symptoms

If you test positive for COVID 19, stay home for at least 5 days. You are likely most infectious during the first 5 days.

ISOLATION

1

Staff/Student does not report to work/school for at least 5 days.

Isolate from others when you have COVID-19.

You should also isolate if you are sick and suspect that you have COVID-19 but do not yet have test results.

If your results are negative prior to the 5 days, you can end your isolation. (A copy of your negative test results must be provided prior to returning.)

Wear a highquality mask through day 10. Day 0 is the day you were tested not the day you received your positive results.

Day 1 is the first full day following the day you were tested.

If you develop symptoms within 10 days of when you were tested, the clock restarts at day 0 on the day of symptom onset. Day 0 of isolation is the day of symptom onset, regardless of when you tested positive.

Day 1 is the first full day, after the day your symptoms started.

Regardless of when you end your isolation, wear a high-quality mask when indoors or around others.

Wear your mask through day 10.

The new guidance states that someone exposed to an individual with COVID-19 no longer needs to quarantine at home, away from others.

Ending Isolation

If you had no symptoms, you may end isolation after day 5.

If you had symptoms, you may end isolation after day 5 if: You are fever free for 24 hours without the use of fever - reducing medication.

Your symptoms are improving.

If you still have fever or your other symptoms have not improved, continue to isolate until they improve.
